

A blend of content knowledge, specific skills, expertise and literacies needed to be confident, connected, actively involved, lifelong learners.

The Learning Areas

The New Zealand Curriculum specifies the learning areas and each area forms part of a broad, rich and balanced education framework for learning.

While the learning areas are presented as distinct, our school curriculum is delivered in an integrated and connected way where learning makes use of the natural connections that exist between learning areas and that link learning areas to the values and key competencies.

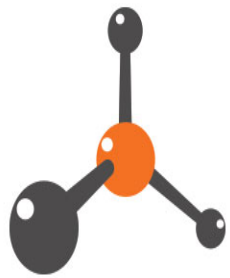

Learners make connections across learning areas and gain deep enduring understandings.

Core Knowledge and Understanding

Our students draw on literacy and numeracy related knowledge, skills and attitudes in order to meet the reading, writing and mathematical demands in all areas of the curriculum.

English
Mathematics and Statistics

Further knowledge, skills and attitudes are developed in the other learning areas

The 21st century interdisciplinary themes of sustainability, global connections, creativity and innovation (enterprise) and citizenship are explored.
